ACCOMPLISHMENTS

- Got First place In Masai project building week. Nov 2021
- Got awarded in college for managing multiple events, solving problems, and team management.

SOFT SKILLS

• Team Collaboration
• Remote Work
•Communication

INTEREST

Web and Android development
Data Structures and Algorithms
Competitive Typing :// keybr.com
Outdoor sports - Football

EXPERIENCE

PINCH | SOFTWARE DEVELOPMENT ENGINEER
June 2022 – July 2023

- Created efficient and dependable code to enhance our Customer Facing App, resulting in improved performance and increased reliability.
- Added a Chat-bot to boost website engagement and provide better customer support, making the site more appealing and user-friendly.
- Developed a Bill Management System that allows users to effortlessly select multiple invoices simultaneously, streamlining bill generation while minimizing unnecessary invoice retrieval.
- Created an Approval Management system for tracking and managing electronic proofs of purchase, enabling clear visibility into who authorized and declined purchases.
- Designed a Customer Relationship Management (CRM) system to gather customer and candidate data, simplifying the process for our staff to identify suitable matches between candidates and customers.
- Has added multiple features to the Web and Android application according to acquired user stories which helped in accomplishing a rich user experience.

Node.js, React.js, React Native, Rest API, Redux, MongoDB

MASAI SCHOOL | FULL STACK WEB DEVELOPER
April 2021 - April 2022

- Created a collaborative project e-commerce website Frontend Masters team of 6 members where I designed the product description page and footer of the website using MERN stack.
- Designed a website Uniqlo with the help of 5 members where I created the sign-in and sign-up page, landing page, header and footer, and product description page using HTML, CSS, JavaScript, and local storage
- Learned Data structure and algorithm and many techniques and problem-solving mindset.

PROJECTS

CARE CREW LINK | WEB APPLICATION

- Designed a stunning user interface.
- Improved email communication with SMTP.js.
- Added a user-friendly callback form.
- Created a dynamic blog page using Sanity.js.
- Integrated a chat-bot for improving users experience.

JavaScript, React.js, Material UI, Sanity.js, HTML, CSS

NYKAA LINK | WEB APPLICATION

- Created a robust authentication system.
- Seamlessly integrated it with the frontend.
- Enabled advanced features like cart management with Redux, including product details, item quantity adjustments, and total price calculations for an intuitive user experience.

HTML, CSS, JavaScript, Material UI, React.js, Redux, Heroku
